

LAKHAN RATHORE

Frontend Developer

+91 9516668168

lakhan.rathore.10.100@gmail.com

Trivandrum, Kerala

PROFILE SUMMARY

React Developer with 2 years of professional experience in building scalable, user-focused web applications within enterprise environments. Strong hands-on experience with React, TypeScript, JavaScript, and modern frontend tooling, along with exposure to backend integration using REST APIs and GraphQL. Proven ability to work in Agile teams, collaborate with Backend, QA teams and cross-functional stakeholders, and deliver high-quality features.

WORK EXPERIENCE

Developer 1 – UST Global

April 2024 – Present

- Worked on Item Setup and Item Modernization initiatives for Albertsons to improve store item onboarding accuracy.
- Designed and developed modular, reusable React components.
- Integrated frontend components with REST APIs and GraphQL.
- Wrote and maintained unit tests using Jest to ensure stability and regression coverage (Best usage of AI agents, copilot and chatGPT).
- Collaborated with backend, QA, and product teams in an Agile environment.
- Participated in sprint ceremonies, client demos, and backlog grooming sessions.
- Worked in a secure VDI cloud-based enterprise development environment.

TECHNICAL SKILLS

Frontend: HTML, CSS, React.js, JavaScript, Redux, Redux Toolkit

Backend & APIs: Node.js (basic), REST APIs, GraphQL, AI API, Third Party API integration

Database: MongoDB

Tools: Git, GitHub, GitHub Copilot, Postman, office365.

Project Management: JIRA, Confluence

Methodologies: Agile (Scrum), SDLC, System Design

PROJECTS

1. Resale Item Application | Albertsons

Role: React Developer

Project Type: Ongoing Enterprise Application

- Contributed to an existing production application through **bug fixes, minor enhancements, and unit test case writing.**
- Worked with **enterprise-scale React codebases**, following established development and Git workflows.
- Supported feature validation through **local and lower environment testing.**

"This project helped build a strong base in understanding large-scale applications and real-world development practices."

2. SCIF – Store Created Item Form

- Developed and enhanced Store Created Item Forms for prepared food categories such as biryani, pizza, burgers, and cakes.
- Implemented dynamic forms and validations to support accurate inventory and item management.

3. Fresh Item Project

Role: React Developer

Project Type: New Product Development

- Core frontend developer for a **new product built from scratch**, actively involved from initial development stages to feature delivery.
- Took ownership of **delivering assigned user stories on time**, ensuring dependent stories could progress without blockers.
- Worked closely with **Backend and UI/UX teams** to clarify requirements, integrate APIs, and translate designs into functional React components.
- Handled **code deployment and testing across multiple environments**, ensuring stability before promoting builds to higher environments.
- Conducted **development smoke testing in lower environments** prior to QA validation and deployments.
- Presented **feature demos to QA teams and Product Owners**.

" This project significantly improved problem-solving, ownership, and confidence while working under real delivery pressure. "

4. Code Sync-Up Activity

Project Type: High-Impact Technical Migration

- Played a key role in **synchronizing Resale Item application code into the Fresh Item repository**, ensured feature stability across modules.
- Responsibilities Served:
 - Syncing codebases and resolving conflicts
 - Verifying features integrity
 - Deploying feature branches to lower environments and testing
 - Debugging and fixing issues identified during testing
 - Leading multiple rounds of development smoke testing and consolidating test results
 - Merging stable changes into the main development branch
- Operated under **high-pressure timelines**, requiring quick analysis, confident decision-making, and close collaboration with multiple team members.

" This activity significantly strengthened technical confidence, decision-making ability, and collaboration skills typically expected at a higher responsibility level "

5. Insurance & Reinsurance Policy and Claims Management System. (Personal Project)

- Built a full-stack MERN application for managing insurance policies, claims, and automatic reinsurance risk allocation.
- Developed Node.js and Express REST APIs with JWT authentication and role-based access control (RBAC) for secure system access.
- Created a modular React frontend with feature-based components, multi-step policy creation forms, and dashboards connected to backend APIs.

EDUCATION

2022: BTech in Information Technology from govt Engineering college Bilaspur, 78%

ACHIEVEMENTS

- Honored with UST Pat on the Back appreciation award – consistency champion.
- Got promoted to attend D3(dream develop disrupt) Internal UST Event for well work performance.
- Nominated for UST "Shining Star" award 2026
